### Hepatitis & HIV Health Disparity Conference and Awards Ceremony

“Hepatitis is increasingly being recognized as a serious issue in the African-American community. Rates of infection are high, and outcomes tend to be worse. They are also less likely to receive the hepatitis A and B vaccines.

Many people have the virus for 20 to 30 years before showing any signs or symptoms. But, once the symptoms surface, the problems begin.”

## HEALTH CARE PROFESSIONALS SESSION

9:00AM-4:30PM

Saturday, October 29

Radisson Chicago & Suites  
160 E. Huron  
Chicago, IL

#### THE CONFERENCE

A 2-Day Conference for HIV and Hepatitis professional health care providers and individuals interested in understanding more about Hepatitis A, B and C and HIV and their growing prevalence within communities of color.

Friday's workshops are targeted to community leaders and others interested in gaining greater knowledge about how Hepatitis and HIV/AIDS can be controlled within their communities.

The Saturday TRAIN-THE-TRAINER education program is targeted to clinicians and healthcare providers. 3.6 CE credits will be given by MATEC (Midwest AIDS Testing + Education Center) of the University of Illinois at Chicago.

#### Also Presenting

- **CURT HICKS**, Regional HIV Prevention & Surveillance STD & HIV
- **NEIL WINSTON**, MD, Director of Communicable Diseases, Cook County
- **CORINNA DAN**, Chicago Department of Public Health, Hepatitis Division
- **ELTON TINSLEY**, MD
- **NEIL SHULMAN**, MD, Emory University Hospital, Atlanta, GA
