COURSE DESCRIPTION AND OBJECTIVES

This course is designed for the clinician interested and involved in the care of patients with disorders of the gastrointestinal tract. The sessions will include didactic lectures followed by discussion.

Following the program, the participant should be able to:

- Explain the causes and symptoms of upper GI bleeding
- Describe diagnosis, and management strategies for gastroesophageal reflux disease
- Explain the long term complications of Hepatitis B
- List the causes and risk factors of Barrett's Esophagus
- Evaluate the clinical effectiveness of wireless capsule endoscopy
- Describe clinical and non clinical strategies for the control of diarrhea and constipation
- Discuss the ethical quandaries in federal disease research allocations
- Explain the emotions, anxieties, and feelings of a patient who is waiting for an organ transplant
- Discuss the most common small bowel disease disorders and their symptoms
- Summarize the issues of a person living with a gluten free diet
