Kudos for your balanced reporting. Contrary to David Brinkman's letter ("World Aids Day: Article unjust, insensitive," Dec. 4, 2008, The Desert Sun), one may note the following:

ADVERTISEMENT

Talk about your team and spy on your rivals.

Try the facebook app.

Total U.S. funding on HIV/AIDS is \$275 billion.

2009 HIV/AIDS budget is \$24billion, and AIDS funding has included billions to help with housing (HOPWA), cash and medicine.

HIV/AIDS receives 10 percent of the entire research budget.

HIV/AIDS deaths have plummeted 90 percent in many states.

\$48 billion is budgeted for global AIDS, TB and malaria. Research funding on every other disease known to man is \$29billion.

Bill Gates has spent \$7 billion on HIV.

Our country's top HIV/AIDS researcher, Anthony Fauci, M.D., said, "The scientific advancements that have been made in HIV are breathtaking, highly effective drugs to suppress HIV to the point where what was a death sentence in the early eighties to now having patients who look and feel well, who are leading very productive, very gratifying lives."

Diabetes kills more Americans than AIDS and breast cancer combined, and cardiovascular disease kills 871,000, compared to 14,016 for HIV/AIDS. The USA is spending \$39 and \$29 on the former, versus \$2,774 on each HIV/AIDS patient. Cease the favoritism in donations/funding for HIV versus non-AIDS illnesses killing millions more Americans.

Dr. Richard Darling,
DDS President & CEO: FAIR Foundation

A lousy dentist with a dwindling practice who is unattractive, unable to attract anyone unless they paid for it but to cheap to pay for it. This guy couldn't catch a STD if he propositioned a blind prostitute. The case is very clear Dr. Darling and his FAIR organization which he is his only member of is nothing more than a joke, makes a failure feel important to say he is the CEO of a nonexistent organization. LanceWinslow might want to be a part of this and he and Darling can pretend to be important!

Another annual letter from the local whack-job dentist, Richard Darling.

"Dr." Darling, if I ever need dental work, I will be sure NOT to call you for treatment. How dare you use "profiling" in caring for your patients that you perceive to be HIV positive? If you think someone is gay or seems sexually active, do you really take extra precautions over the little old lady who you think could never in a million years have the virus?

I can't believe that you and your so called "FAIR" foundation with its homophobic agenda to deny increased funding for people with AIDS is still in existence ... The diseases you are partial to can certainly have a piece of the pie if you concentrate your efforts toward fighting them and not others.

You are as bigoted as someone who thinks our national security means only going after people who you "perceive" to be Muslim. Come out of the closet "Mr. Craig" and tell us the real reason behind your hateful agenda.

Nice one Josef. This Lance guy is a total nut case. Since he doesn't seem to want an open mind maybe he just needs to crawl back under that rock he came out from.

GayMessiah wrote:

It is obvious from reading this dentist's profile that he is biased against HIV/AIDS research and treatment in favor of his own disease, diabetes Type 2. My guess is that he is a self-serving health care provider who wishes to punish HIV/AIDS patients for having a disease different than his own, which he feels should be numero uno in research and funding. Dentists are generally not the type of doctors that have any expertise in HIV/AIDS or Diabetes. He is entitled to his opinion, but that's all it is, and it is not based in fact or reality. The numero uno killers in this country are tobacco, alcohol, cancer, motor vehicles, and refined sugars resulting in cardiovascular disease, lung disease, liver disease, brain disease, kidney disease, and stroke. The numero uno killer of young black women and young gay men is still HIV/AIDS. He should focus his attention on his practise of dentistry and on eliminating tobacco, alcohol, refined sugars, and automobiles from production in this country.

LanceWinslow wrote:

I believe we ought to make an aggressive plan and funding to wipe out cancer completely in the next 5 years and spend 100 Billion on that. HIV/AIDS has plenty of private funding and international global concerns working on it. I understand politics and how the squeaky wheel gets the oil, but, it's time to do what's right and de-fund HIV and AIDS research and spend the money where it can do the most good. The answer to getting rid of the HIV problem is to curtail the promiscuity of at risk males who are gay and get druggies to stop sharing needles.
