Raynard S. Kington, M.D., Ph.D.
Acting Director: National Institutes of Health
Rockville Pike, Bethesda, MD

RE: Requesting a cessation of HIV/AIDS favoritism in bio-medical research funding

Dear Acting Director Kington,

In regards to the continuing requests by CDC Director Gerberding and NIH Directors Fauci and Fenton for additional billions of dollars for HIV/AIDS programs, please note the following facts that are most pertinent in this time of our country's and our government's financial crisis:

- The amount of funding on HIV disease by our government since the inception of HIV in our country is now approximately \$275 billion dollars.ⁱ We are spending \$700 billion to rescue our country and we've budgeted/or spent more than one-third that amount on one disease.
- The 2009 HIV/AIDS budget request is already large at \$24.1 billion.ⁱⁱ
- The NIH NIAID budget for HIV/AIDS bio-medical research is \$2.9 billion, which is a full ten percent of the entire bio-medical research budget.ⁱⁱⁱ
- HIV/AIDS deaths have plummeted over 90 percent in many states (see enclosed sheet) including a 98 percent decline in newly-infected patient deaths in California from 9,764 to 229.^{iv}
- \$48 billion has been budgeted this year for PEPFAR and global HIV/AIDS, TB and Malaria. Consider: the amount of NIH bio-medical research on every disease know to man is only \$29 billion yet we budget \$48 billion, a preponderance of which will go toward one disease in one country: HIV in Africa.^v
- The Bill & Melinda Gates Foundation has spent approximately \$7 billion on global HIV efforts to date and is approaching \$1 billion in expenditures for HIV vaccine research,^{vi}
- Warren Buffet has pledged most of his wealth to the Gates Foundation and Buffet is supportive of Gates bias in favor of HIV/AIDS funding.^{vii}
- Our country's top HIV/AIDS researcher, Dr. Fauci has said, "...the scientific advancements that have been made in HIV [research] are breathtaking [with] highly effective drugs to suppress HIV to the point where what was a death sentence in the early eighties to now having patients who look and feel well, who are leading very productive, very gratifying lives..."

- I have included a CD of Dr. Fauci stating this telling statement for your review.

When our organization exhibits at large conventions and the attendees see our banner that is shown on the enclosed brochure, a new member joins, on average, every 2 minutes all day long while expressing great anger and disgust at the favoritism that continues to be afforded HIV disease in funding by our government.

For example, it is well recognized that hepatitis C (HCV) is responsible for more deaths in AIDS patients than the opportunistic infections that used to kill them.^{viii} Diabetes kills more Americans than AIDS and breast cancer combined and cardiovascular disease (CVD) kills 871,000 compared to 14,016 for AIDS. The NIH is spending \$20, \$39, \$29 on each patient with HCV, diabetes & CVD on bio-medical research versus \$2,774 on each HIV patient. Similar small amounts are being allocated for thousands of other illnesses, including 6,000 rare illnesses that receive, on average, only \$200,000 per illness from the NIH for biomedical research.^{ix} It is time to cease the favoritism for HIV.

We are respectfully requesting that you cease the bias for HIV/AIDS funding and that consideration be given to increasing the funding for non-AIDS illnesses. Indeed, with budgetary limitations now in place due to our government's financial crisis that prevent overall increases, we recommend that Congress and the NIH do what homeowners are doing: reallocating funds where appropriate, in this case from HIV to other illnesses that have not had the same success that Dr. Fauci has laudably achieved and describes so well on the CD.

Thank you for your consideration of this request and we extend our sincere congratulations on your appointment as Acting Director.

Sincerely yours,

 and our 26-member Board of Directors listed below

Richard Darling, DDS, Past National Public Citizen of the Year
President & CEO, FAIR Foundation

Founder: The FAIR Foundation Liver Disease & Transplant Support Group

Author: Coma Life, an autobiographical memoir of life "within" coma and survival over hepatitis C, liver cancer, 3 liver transplants, heart attack, diabetes & muscular dystrophy

ⁱ Henry J. Kaiser Foundation reports \$150 billion HIV funding up to 2004. Every year thereafter the amount budgeted has been \$20+ billion including \$24.1 billion for 2009. In addition, one must note the \$48 billion PEPFAR funding, of which approx \$30 billion is for global AIDS.

Board of Directors

John Fung, MD, Ph.D., FACS, Chairman, Department of General Surgery; Director, Transplant Center, Cleveland Clinic Foundation

Phil Berry, M.D., Advisory Committee for Organ Transplantation (ACOT) appointed by Secretary Tommie Thompson, Health & Human Services, 2001-2004; Past President, Texas Medical Association; President, Texas Medical Assoc. Foundation; Past Member, Board of Directors and Finance Committee, UNOS

Waldo Concepcion, MD; FACS, Associate Professor of Surgery, Chief of Clinical Transplantation, Chief of Pediatric Kidney Transplantation, Stanford University School of Medicine

Donald Hillebrand, MD, Hepatologist; Medical Director, Liver Transplantation, Associate Professor of Medicine, Scripps Green Transplant Center, La Jolla, CA

Bob Gish, MD, Medical Director of the Liver Disease Management and Transplant Program at California Pacific Medical Center (CPMC); Division Chief, Hepatology and Complex Gastroenterology at CPMC Physicians Foundation; Associate Clinical Professor of Medicine at the University of Nevada in Reno and at University of CA San Francisco; Member of the American Association for the Study of the Liver, the American Gastroenterological Association, the American Society of Transplant Physicians, and the International Liver Transplant Society.

Charles J. Goodacre, DDS, MSD; Dean of the Loma Linda University School of Dentistry; President of the American College of Prosthodontists; Recipient of the William J. Gies Awards for Vision, Innovation, and Achievement, recognizing outstanding innovation by a dental educator. Past President of the American Board of Prosthodontics ; Executive Council Member of the Academy of Prosthodontics.

Pedro W. Baron, MD, Director of Pediatric and Adult Liver Transplantation; Associate Professor of Surgery, Loma Linda University Medical Center

Melba Moore, MS, Commissioner of Health, St. Louis City Department of Health, St. Louis, Missouri; Member, Webster University's Arts and Sciences Advisory Board, St. Louis Connect Care, and the Regional Health Commission; John F. Kennedy School of Government for State and Local Executives; 20 years experience in the public sector, management and executive leadership.

Leonard J. Morse, MD; Commissioner of Public Health, Worcester, Massachusetts; Professor of Clinical Medicine and Family Medicine and Community Health, University of Massachusetts Medical School; Chair Emeritus, American Medical Association's Council on Ethical and Judicial Affairs; Past-President of the Massachusetts Medical Society.

Jacqueline Marcell, Caregiving Advocate: Alzheimer's Disease; Author, *Elder Rage* / Publisher / Radio Host / Speaker / Eldercare Advocate

Okechukwa Ojogho, MD, Director, Pediatric and Adult Kidney, Pancreas Transplantation; Associate Past Director, Liver Transplantation; Associate Professor of Surgery, Loma Linda University Medical Center

Jill Weissman, PharmD, Transplant Pharmacist; Assistant Professor, Department of Pharmacy Practice, Loma Linda University School of Pharmacy

Bill Remak, B.Sc.MT, BA PHA Chairman, California Hepatitis C Task Force, Founder: National Association of Hepatitis Task Forces

Lorenzo Rossaro, M.D., Medical Director, Liver Transplant Program; Chief, Division of Gastroenterology and Hepatology, University of California, Davis Medical Center

Ray Hill, Patient Advocate: HIV/AIDS & Hepatitis C

Richard Swabb, M.D., Board Certified in Nephrology and Board Certified in Internal Medicine, Loma Linda University Medical Center

Sandra Rogers, Patient Advocate: Parkinson's Disease & Stroke

Norman Kay, Patient Advocate: Prostate Disease

Philip Rugo, Patient Advocate: Alcoholic Liver Disease (ALD); Past Director, Harrison House Substance Abuse Rehabilitation Center

Art Curley, Attorney-at-Law; President, Bradley Curley Asiano Barrabee & Crawford, PC

Leigh Aveling, D.Min. MFT, Chaplain: Loma Linda University Medical Center and Loma Linda University Behavioral Medicine Clinic; Adjunct Assistant Professor, Faculty of Religion, Loma Linda University. Loma Linda, California

James M. Ward Captain, SC, USNR (Ret.), Patient Advocate: Heart Disease

Dave Courtney, Patient Advocate: Alpha-1-antitrypsin lung/liver disease; Vice President, The Presumed Consent Foundation

Kress Darling, Patient Advocate, Migraine Headache & Osteoporosis

HIV/AIDS Death Totals by State including the District of Columbia Compiled from each State's Department of Public Health

NOTE* The death totals from many states' (e.g. CA, IL) include deaths from non-AIDS causes, such as automobile accidents, assault, heart attack, etc. In other instances, HIV/AIDS deaths are under-reported due to insufficient reporting and in some instances, opportunistic infections are stated on the death certificate instead of HIV/AIDS.

State	Deaths	Year	% ↓
Alabama	132	2006	72%
Alaska	6	2006	84%
Arizona	33	2006	84%

The total reported above by all fifty states and DC is **10,778**.

The Center for Disease Control estimate is 30 percent higher at **14,016**.

When you were in high school, if your father had slipped you \$29 in crisp dollar bills, you would've been elated. But what if he then turned to your sister and handed her \$2,774? Would you have shouted...

“That’s not fair!”

Without a doubt.

The **FAIR**
Fair Allocations In Research
FOUNDATION

“Is this fair?”

NIH Research Money Budgeted per Death

“We don't think so!”

The Issue

Cardiovascular disease kills 870,000 per year vs. 14,016 for AIDS
Cardiovascular disease: \$2,714 per death vs. \$206,906 for AIDS

THE TRUTH

Believe it or not, if you or a loved one suffer from cardiovascular disease (CVD) or any other disease except cancer, our government has handed you that \$29 dollars for bio-medical research or a similar small amount, while unfairly giving each of your sisters and brothers – a.k.a. patients suffering from AIDS – a whopping \$2,774.

The lion's share of the Federal research budget is spent on AIDS – a disease that is killing a fraction of Americans each year when compared with diseases like diabetes and Alzheimer's. Even the flu kills twice as many people as AIDS.

CVD kills 870,000 every year, which is 62 times more than AIDS. Diabetes kills more Americans than AIDS and breast cancer combined, yet the government is spending only \$39 on each diabetic compared to that \$2,774 on each HIV patient. The shocking truth is that CVD receives over 1/2 billion less than AIDS, and the increase in AIDS funding since 1999—just the increase— is greater than the entire budget for every other disease except cancer. Billions for AIDS also comes from pharmaceutical companies, the 50 states, celebrities and well-intentioned citizens like Bill Gates.

FAIR IS FAIR

The FAIR (Fair Allocations In Research) Foundation is dedicated to equitable research funds for all diseases, including the 16 that kill a million more Americans than AIDS annually. Our secondary factors insure diseases that cause great suffering with low mortality (6,000 rare illnesses) will also receive increased funding.

AIDS activists should be commended for reducing AIDS deaths 98 percent in California's newly infected patients and over 90% in many other States. But now it is time to start giving other diseases their fair share of research dollars so that they, too, can experience better health.

But the need for change isn't just about AIDS. The amount spent on research for the "Health Effects of Climate Change" is greater than the funding for brain cancer, Down Syndrome, cystic fibrosis, autism, cerebral palsy, cervical cancer, hepatitis B & C, multiple sclerosis, muscular dystrophy, uterine cancer and 6,000 other maladies. That's not fair either.

Choose today to join the thousands of FAIR Foundation members and supporters in all fifty states who are calling for change.

Are these Fair Allocations In Research?

Disease	2009 NIH Research \$	Deaths Per Disease	\$ Per Patient Death	\$ Per Patient
COPD	90 Million	126,128	\$ 714	\$ 7
Hepatitis C	107 Million	12,000	\$ 8,916	\$ 20
Cardiovascular Disease	2.3 Billion	871,500	\$ 2,714	\$ 29
Hepatitis B	42 Million	5,000	\$ 8,400	\$ 34
Diabetes	1 Billion	74,817	\$ 13,365	\$ 39
Parkinson's Disease	186 Million	19,547	\$ 9,516	\$ 124
Alzheimer's Disease	644 Million	71,696	\$ 8,928	\$ 124
Prostate Cancer	344 Million	27,050	\$ 12,717	\$ 181
HIV/AIDS	2.9 Billion	14,016	\$ 206,906	\$ 2,774
All Cancers Total	5.5 Billion	559,650	\$ 9,888	\$ 3,830
Breast Cancer	716 Million	40,910	\$ 17,501	\$ 3,967
West Nile Virus	56 Million	124	\$ 451,613	\$ 15,427

6,000 orphan (rare) diseases receive, on average, only \$200,000 per illness.
